

ec² Software Solutions is a growing software company located in Somerset, New Jersey. For over 25 years, we have been providing solutions to the Nuclear Medicine and Molecular Imaging Industry.

If you have an instinctive drive to succeed, a career move to ec² Software Solutions can put you on the fast track to achieving your goals. We seek individuals that want to continually learn and grow as part of our successful organization.

PET-Cyclotron Quality Management Software Applications Specialist

ec² Software Solutions has developed the BioTRAX QMS® software for quality management within PET manufacturing facilities that produce F-18 FDG and other PET radiopharmaceuticals for both commercial and investigational use. We are seeking a seasoned individual who specializes in PET Radiopharmaceutical production and or manufacturing quality processes to coordinate software implementation.

Responsibilities:

- Initiate contact with new customers
- Coordinate and complete installations for new customers
- Be highly engaged in the Quality Team for developing testing protocols for both in-house software validation and customer sites
- Complete all installation documentation for each new customer and existing customer upgrades
- Work with the Quality Team to document all in-house testing of new releases
- Document all requests from customers into change control process
- Communicate status of customer requests back to customers
- Answer all technical support questions from customers in a timely manner
- After customer has been established with the software successfully transition customer to the remainder of the applications team

**Requirements:**

- Strong understanding of the PET Radiopharmaceutical manufacturing process and clinical applications
- An understanding of Software Quality regulations
- PET Radiochemistry Technician or Cyclotron Technician experience preferred
- Solid understanding of regulatory requirements including
 - cGMP
 - FDA Part 212
 - FDA Part 11
 - Quality Management Principles
- Understand computer hardware and networking and how it applies to Client/Server software
- Willing to dive into software environments and technical issues
- Ability to work successfully under tight project deadlines

Benefits:

Due to Covid 19 we are accepting resume's from anywhere within the US. Our offices are located in New Jersey and Nevada, but we welcome a self-motivated remote worker for this position. We offer a competitive salary and an extensive benefits package including paid time off and health insurance. Future growth opportunities are available within the company. We strive to provide a collaborative, creative environment where each person feels encouraged to contribute to our processes, decisions, planning and culture.
