

ec² Software Solutions presents Lisbon, a web based software designed for Drug Owners and Contract Manufacturing Organizations to have customizable visibility to order information.

FEATURES

1. Web based interface that provides a customizable dashboard for all orders
 2. Contains an API engine that allows clients to consume the specific data they are targeting
 3. See the status of all orders from a Drug Owner point of view
 4. Orders can go directly from the Clinical site to a Drug Owner or a Contract Manufacturing Organization
 5. The Clinical site is able to use any ec² software package (NMIS/BioDose/WebOLO) to generate the order
